

Chief, Services Branch

21 May 1948

Acting Chief. FBIB

| 1. Radio monitoring is necessarily conducted at an isolated spet and the location near Kyrenia was selected for this reason. Operations will be conducted around the clock, and it will be necessary for employees to report for daty on shifts at approximately 8 hour intervals. 2. The proposed site is approximately two miles from the nearest housing or public transportation. Public transportation on Cyprus, except for relatively expensive taxis, is completely inadequate in any case. 3. With the exception of a few classified employees, the numbers of the staff, numbering approximately 55, will be drawn from local recruitment and foreign nationals imported from Egypt and paid according to a wage schedule completely dispropertionate to the earnings of classified employees. These employees will not have automobiles or be able to afford taxi fare and transportation to and from work. 4. In view of these considerations it will be necessary for the Agency to operate a regular transportation service between the site and | - ATTE | curer, ser | | |
